Brendan

“Brendan is very complex on paper. He has gone through so much, more than most people go through in a lifetime. However, he is truly the happiest baby I have ever met. When it comes to normal baby stuff, he is soooo much easier than my first son was. Brendan just loves life and loves to go places and see new things. **He may have disabilities that limit him, but it doesn't limit his love of life.** ” (Mother)

Cardiology, Interstage Team and Pediatricians are Quarterbacks!
